WORK EXPERIENCE

Senior Devops Engineer

Bravezone Softech Pvt. Ltd

01/2024 - Present

Pune

Responsibilities:

- Designed and managed end-to-end CI/CD pipelines using Azure DevOps, enabling automated build, test, and deployment across multiple environments
- Implemented Infrastructure as Code (IaC) using Terraform to provision and manage Azure resources with consistency and scalability
- Integrated security and compliance controls including Azure Key Vault, Managed Identities, and secure secret management
- Performed advanced troubleshooting of Kubernetes workloads, including pod failures, crash loops, and scheduling issues
- Worked on cost optimization strategies by analyzing resource utilization and implementing efficient cloud resource management
- Deployed and maintained applications using Helm charts, YAML manifests, and rolling update strategies

Junior DevOps Engineer

Bravezone Softech Pvt. Ltd

05/2022 - 12/2023

Pune

Responsibilities:

- Performed user management, file permissions, and process monitoring using Linux commands
- Implemented version control best practices using Git, integrating repositories with CI/CD pipelines in Azure DevOps to enable automated, reliable code deployments
- Implemented Docker-based containerization to improve application portability, scalability, and deployment efficiency.
- Integrated Prometheus and Grafana with Kubernetes (AKS) to enable centralized monitoring, alerting, and observability of containerized applications.
- Handled basic troubleshooting and debugging of applications, containers, and CI/CD pipelines to ensure smooth deployments.

EDUCATION

Bachelor of Engineering

Sinhagad Academy of Engineering, Kondhawa

08/2018 - 08/2021

7.43 (CGPA)

TECHNICAL SKILLS:

CI/CD & Automation: Jenkins, Bitbucket, Gitlab

Version Control: Git

Cloud Platforms: Microsoft Azure, AWS

Infrastructure as Code: Terraform

Containers & Orchestration: Docker, Kubernetes

Monitoring & Observability: Prometheus, Grafana

Scripting & Automation: Python

Methodologies: Agile, Scrum

ACHIVEMENTS & CONTRIBUTION

Intelligent Observability – AI-Based Incident Detection & Auto-Remediation System

- Tech Stack Used: Azure Monitor, Log Analytics, Azure Functions (Python), Azure OpenAI (GPT-4), Terraform, ServiceNow API, Synapse Analytics, Key Vault.
- Reduced MTTR from 2–3 hours to < 15 minutes through AI-driven automation
